Allowable Subject Matter

Claims 31 and 34-63 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to show or fairly suggest a hollow elastic body in which a piezoelectric actuator may or may not be disposed, but whether disposed or not, prestresses the piezoelectric actuator, and which housing has a plurality of recesses and further includes a first seam that extends parallel to the longitudinal length of the body and, a second seam, which if the piezoelectric actuator is disposed in the hollow body, is located selectively at one or both end portions of the hollow body, but not medially located, and if the piezoelectric actuator is disposed outside the hollow body, the second seam is located at least on a first end portion of the hollow body and is diametrically opposite the first seam.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Direct inquiry to Examiner Dougherty at (571) 272-2022.
